Torque Measurement Solutions for You

Meet Wayne Fregeau

We are happy to announce that Wayne has joined our team as the new Sales Manager. He comes to us with a proven ability to optimize sales and enhance customer solutions.

Huge bonus - Wayne is very familiar with torque sensors!!! This means Steve Tvetter gets to concentrate in more areas and we'll be able to assist you more quickly. Welcome, Wayne!

Ever Wonder Why?

We created a short but explanatory infographic which depicts exactly why a Bearingless torque sensor may be the answer for your particular application.

[Take a look!](#)

FIVE REASONS TO
CHOOSE A
BEARINGLESS
TORQUE SENSOR

Rotating Torque Wheels!

Did you know we offer a complete range of wheel torque sensors for measurement of road load driving forces, braking effort, emissions coastdown testing, wheel speed, etc.? Models are available with different signal output configurations, mV/V, high level DC analog or digital. They are available in Universal, 4, 5, 6 or 8 Bolt patterns. Torque ranges are from 56.5 Nm to 56.5 kNm. All will deliver exceptional performance, durability and accuracy. [Learn more about the specifications!](#)

Time to talk torque with us in person? Steve Tveter and Wayne Fregeau will be at the Automotive Testing Expo from October 22-24. Register for your free entry pass [here](#).

Of course, you're always welcome to call. We'd love to help you.

About us:

S.HIMMELSTEIN
& COMPANY

*Designing and Making the World's Best
Torque Instruments Since 1960*

sales@himmelstein.com

Focused exclusively on torque sensors since 1960, [Himmelstein](#) designs and makes the world's best torque sensors, transfer standards, and instrumentation. Products include rotating and reaction sensors from 10 ozf-in to 8,850,000 lbf-in, in virtually every mechanical configuration. All are calibrated CW and CCW to full capacity in our ISO/IEC17025.2017 accredited laboratory.
